

Transparency in Coverage Rule: Machine Readable Files

In compliance with The Transparency in Coverage Rule, issued in 2020, effective beginning July 1, 2022, health plans and health insurance issuers must publish two separate Machine-Readable Files (MRFs) containing In-Network and Out-Of-Network details. AlphaBOLD is pleased to provide the following information to participants.

The links provided below by each carrier lead to the MRFs that are made available in response to the federal Transparency in Coverage Rule. The MRFs are formatted to allow participants, researchers, regulators, and application developers to easily access and analyze data.

Please review the carrier sites below and direct any additional questions to the applicable carrier.
